Commercial Window Blind Solutions •

What We Offer

- Free site survey to assess customers' requirements and make recommendations and proposals on the most effective solution.
- A professionally presented estimate giving a clear and concise summary of the products offered and their costs. This includes tender documents where applicable or necessary.
- A post order receipt survey to establish manufacturing sizes and obtain essential installation details.
- Liaison/co-ordination with customers and their own contractors or sub-contract electricians to establish proposals for controls and the provision of wiring diagrams / schematics to enable first and final fix wiring.
- Testing and Commissioning of all systems.
- Method statements and Risk Assessments for all on-site activities.

- An experienced team of installers all with site experience and CSCS cards reporting to a manager with a 5-day SMSTS qualification.
- Job Specific O & M Manuals.
- A one stop contact to resolve any issues or problems post installation.
- A project management service to oversee and ensure your job is completed on time and within budget.
